EDUCATION

Singapore Management University

Singapore

Bachelor of Science in Computer Science

August 2020 – May 2024

- Technology Executive at SMU Ellipsis, the constituent body for the School of Computing and Information Systems
- Honorary Finance Secretary of SMU Stereometa, the premier student DJ-ing community in Singapore
- Finance Head of Project Teung VI, a community service project to teach English and Financial Literacy to Thai youth

EXPERIENCE

Software Engineer Intern

May 2022 – Present

Ox Street (Carousell Group)

Singapore

- Ox Street is a streetwear marketplace part of the Carousell Group for new and used sneakers
- Developed a full rehaul of the main web application in NextJS with TypeScript, working full-stack
- Worked on backend services for pricing and category management with Express and TypeScript
- Followed best practices and interaction testing during phased development

Data Science Intern

June 2021 – September 2021

Ox Street (Carousell Group)

Singapore

- Implemented conversion tracking and data visualisation with various tools such as Google Analytics, Amplitude, Intercom, Pandas
- Programmed an internal price-monitoring service with Flask on Heroku to gather up-to-date and accurate sneaker pricing data, allowing the number of accurate listings on the app to double
- Wrote various Python scripts to automate workflows for catalogue managers

PROJECTS

Rupiks | *Flutter, Dart, C++*

In Progress

- Developed a mobile application to solve a Rubiks Cube based off of camera input from the device
- Integrated an algorithm to solve any given cube efficiently

Locus | *Spring, React, Flask, GCP*

August 2021 – November 2021

- Locus is event-management platform for the new normal where communities can organise physical events without hassle
- Utilised the Spring MVC Framework to build various APIs for the management of users & events, with automated vaccination certificate verification using GovTech's OpenAttestation client
- Programmed a web scraper microservice in Flask that collects prevailing COVID-19 regulations and event capacity limits from verified sources and integrates them into the main application
- The project was presented an Outstanding Project Award by Credit Suisse

Candour | *Flask, React, Solidity, Truffle*

August 2021 – November 2021

- Candour is a decentralised application meant to allow clothing companies to document the stages of their supply chain on the blockchain in an immutable manner
- Programmed an indexer microservice to track completed product cycles to be displayed on a product discovery page for users
- Assisted in writing smart contracts which could be interacted with via MetaMask on the browser to perform blockchain transactions

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL (Postgres), TypeScript, Dart, HTML/CSS

Frameworks: React, NextJS, Flask, Node.js, Flutter, ExpressJS, Spring

Developer Tools: Git, Docker, AWS, Google Cloud Platform, Heroku, VS Code

Libraries: pandas, NumPy, matplotlib

Certifications: Oracle Certified Foundations Associate (Java)
