## EDUCATION

---

### Singapore Management University

Singapore

*Bachelor of Science in Computer Science*

*August 2020 – December 2023*

- On track to **Magna Cum Laude**
- **Teaching Assistant** for Collaborative Software Development (CS203)
- **Relevant Coursework:** Data Structures, Design and Analysis of Algorithms, Networks, Operating Systems, System Design, DevOps, Machine Learning, & Big Data Architecture
- Technology Executive at SMU Ellipsis, the student body for the School of Computing and Information Systems
- Honorary Finance Secretary of SMU Stereometa, the premier student DJ-ing collective in Singapore

## EXPERIENCE

---

### Software Engineering Intern

January 2023 - May 2023

*Grab*

*Singapore*

- Grab is South East Asia's first decacorn; a super-app which provides users transport, deliveries and payments
- Building internal data tools and platforms in the Automated Scalable Insights team
- Designing scalable systems using AWS and Azure services
- Technologies used: **Python, ExpressJS, AWS, Azure, Flutter**

### Software Engineering Intern

May 2022 – August 2022

*Ox Street by Carousell Group*

*Singapore*

- Ox Street is a streetwear marketplace part of the **Carousell Group**, for new and used sneakers
- Developed a full overhaul of the main web application in NextJS with TypeScript React, working full-stack
- Built a **recommender system** using gathered user events to train a **machine learning model** which recommends similar products that other users view & like
- Implemented a pipeline for **internationalisation (i18n)**, translation management and automatic routing
- Followed best practices in phased development, writing unit tests and interaction tests with **Storybook**

### Data Science Intern

June 2021 – October 2021

*Ox Street by Carousell Group*

*Singapore*

- Implemented data visualisation, processing and conversion tracking with tools such as **Pandas** & Google Analytics
- Programmed a **price-monitoring service with Flask on Heroku** to gather up-to-date and accurate pricing data, allowing the number of accurate listings on the app to increase by over 100%
- Wrote various Python scripts to automate workflows for catalogue managers

## PROJECTS

---

### Rupiks | *Flutter, Dart, C++*

In Progress

- Developed a **cross-platform mobile application in Flutter** to solve a Rubik's Cube based off of camera input from the device with the use of computer vision techniques
- Integrated a **C++ Foreign Function Interface (FFI)** to solve any given Rubik's cube efficiently using Korf's Algorithm and pattern databases

### Locus | *Spring, React, Flask, GCP*

August 2021 – November 2021

- Locus is an event-management platform for the new normal - where communities can organise physical events without hassle; which was presented an award by the sponsor, **Credit Suisse**
- Utilised the **Spring MVC Framework** to build various APIs for the management of users & events, with automated vaccination certificate verification using GovTech's OpenAttestation client
- Programmed a **web scraper microservice in Flask** that collects prevailing COVID-19 regulations and event capacity limits from verified sources and feeds the data to the main application

## TECHNICAL SKILLS

---

**Languages:** Python, C++, Java, C, TypeScript, SQL, Dart

**Frameworks:** React, gRPC, Node.js, FastAPI, Flutter, ExpressJS, Spring

**Tools:** Git, Docker, AWS, Google Cloud Platform, Azure, Heroku, MongoDB,  $\text{\LaTeX}$

**Libraries:** TensorFlow, Keras, pandas, NumPy, matplotlib

**Certifications:** Oracle Certified Foundations Associate (Java)
